40 Years of Leadership

The Renewable Fuels Association has been the driving force behind all the major developments that helped grow the U.S. ethanol industry.

Today

More than 200 ethanol plants around the country have the capacity to produce more than 17 billion gallons of ethanol. The industry supports roughly 350,000 jobs and provides over $40 billion to the national GDP.

We are the leading trade association for America’s ethanol industry, working to drive expanded demand for American-made renewable fuels and biofuels worldwide. Our vision is to help the world breathe easier with the power of renewable fuels.
