

March 17, 2022

President Joseph Biden
The White House
1600 Pennsylvania Avenue, N.W.
Washington, DC 20500

Dear Mr. President,

We are farmers and biofuel supporters from across the country who support your pledge to use “every tool at our disposal” to lower gasoline prices and deliver relief to American families who are experiencing pain at the pump with every fill-up. However, we are concerned the actions taken so far only expand our reliance on petroleum fuels and do not seize upon the opportunity presented by domestic, clean-burning, low-carbon renewable fuels like ethanol and biodiesel.

Following Russia’s invasion of Ukraine, we saw oil prices surge to more than \$125 per barrel, and gasoline prices topped \$4.30 per gallon. These inflationary impacts are devastating to family budgets already strained by the economic impacts of COVID. Opening the Strategic Petroleum Reserve might have had a very modest impact on oil supplies, but it is certainly no long-term solution to address pump prices. Investigating anti-consumer behavior by oil companies hasn’t helped lower prices. And, suspending the federal gas tax, as has been suggested, would be short-sighted and threatens to leave our nation’s roads and bridges in disrepair. By maintaining our dependence on crude oil, all of these proposed solutions only strengthen Vladimir Putin’s ultimate objective of using Russia’s petroleum resources as a strategic weapon in the current conflict. To thwart Putin’s ability to use oil as a weapon, we must demonstrate that we do not need—and do not want—Russia’s petroleum.

Fortunately, there IS an alternative! Biofuels like ethanol are underutilized in today’s fuel market, largely because outdated government regulations handcuff market access and deny consumers choice at the pump. For example, EPA regulations currently prohibit the use of higher ethanol blends like E15 for much of the year, even though the fuel has been legally approved by EPA for use in more than 97% of the cars and trucks on the road. Simply allowing gasoline blenders to sell E15 year-round would instantly help moderate prices at the pump and deliver relief to American families. Today, E15 is selling for 10-25 cents per gallon less than standard gasoline, meaning year-round use of the fuel would save the average American household at least \$125-200 on its annual gasoline bill. Those savings would accrue immediately while also providing energy, environmental and economic benefits for the long-term.

Mr. President, we can replace ALL the crude oil we import from Russia with increased domestic production of ethanol and biodiesel. We ask that you utilize your authority to remove regulatory barriers to expanded biofuel use, including specifically allowing the year-round use of E15 immediately. Doing so would provide relief to consumers today, while also reducing greenhouse gas emissions and supporting the farm economy. We stand ready to unleash the power of American agriculture to enhance our nation’s energy and environmental security.

Sincerely,

Edward Hauer Bloomville OH
